

1. Write a program to print "Hello, World!" to the console.
2. Write a program that asks the user for their name and then prints a greeting using their name.
3. Write a program that calculates the sum of two numbers the user enters.
4. Write a program that converts a temperature in Fahrenheit to Celsius.
5. Write a program that prints the numbers from 1 to 10.
6. Write a program that prints the even numbers from 1 to 10.
7. Write a program that prompts the user for a number and then prints whether that number is even or odd.
8. Write a program that prompts the user for their age and then tells them how many years until they turn 100.
9. Write a program that prompts the user for a number and then prints the factorial of that number.
10. Write a program that prompts the user for a word and then prints the reverse of that word.
11. Write a program that prompts the user for a sentence and then counts the number of vowels in that sentence.
12. Write a program that prompts the user for a list of numbers and then calculates the average of those numbers.
13. Write a program that prompts the user for a list of words and then prints the shortest word.
14. Write a program that prompts the user for a list of numbers and then prints the most significant number.
15. Write a program that prompts the user for a list of numbers and then prints only the even numbers.

Additional:

- Write a program to check whether an input number is prime or not
- Write a program to check whether a year is a leap year or not
- Write a program that computes the nth Fibonacci number(using for loops)
-
